

Elevate Your Professional Value

OSAP-DANB Dental Industry Specialist in Infection Prevention and Control™ (DISIPC™) Certification

Pathway 1

To earn DISIPC certification, candidates must meet the education and experience requirements to be eligible to apply for the DISIPC exam — which will be launched in mid-2021.

EDUCATION

To meet the education requirement, candidates must complete **both** of these education components (1 and 2).

1. Hold the [OSAP-DALE Foundation Dental Infection Prevention and Control Certificate™](#) **AND**
2. Complete **one** of these education options:
 - a. DALE Foundation's [DANB® ICE® Review course](#) **OR**
 - b. [From Policy to Practice: OSAP's Guide to the CDC Guidelines](#) **OR**
 - c. OSAP's [OSHA & CDC Guidelines: OSAP Interact Training System](#) **OR**
 - d. [OSAP Dental Infection Control Boot Camp™](#) **OR**
 - e. Hold a life sciences or applied life sciences degree **OR**
 - f. Graduate from a Commission on Dental Accreditation (CODA)-accredited dental school, dental hygiene, dental assisting or dental laboratory technology program

EXPERIENCE

To meet the experience requirement, candidates must demonstrate completion of at least 1 continuous year of work experience in the oral or medical healthcare professions or working for a manufacturer or distributor of dental infection prevention and control products.

EXAMINATION

Pass the OSAP-DANB DISIPC exam (in-person at a Pearson VUE test center)

Pathway 2

Pathway 2 is intended for those who hold [OSAP-DANB Certified in Dental Infection Prevention and Control™ \(CDIPC™\)](#) certification.

Those who hold CDIPC certification will be eligible to apply for the DISIPC exam — which will be available in mid-2021.

EXAMINATION

Pass the OSAP-DANB DISIPC exam (in-person at a Pearson VUE test center)

DISIPC Certification Renewal Requirements

DISIPC certification is maintained by meeting recertification requirements. DISIPC recertification requirements are under development.
