

New! Online Infection Control Resources

The Organization for Safety, Asepsis and Prevention (OSAP) and the DALE Foundation have jointly launched several interactive online Continuing Dental Education Article™ (CDEA®) modules. These modules have been created by leading infection control experts. You can read and review the article at your own pace, on your own schedule, with access to each article for up to six months.

Each module is 2 CE credits and \$30. Get started today!

COVID-19 Respiratory Droplet and Aerosol Protection

Safety for patients and staff is always a top priority in dentistry. This interactive article presents a real-world scenario that provides context for respiratory droplet and aerosol protection during the COVID-19 pandemic.

General Aspects of Instrument Processing

Instrument sterilization is just one step in the chain of procedures needed to prevent the spread of potentially pathogenic microbes from contaminated instruments to patients. This article presents a real-world scenario that provides context for important concepts of instrument processing, along with strategies and recommendations to prevent negative outcomes. [LEARN MORE!](#)

Understanding CDC's Summary of Infection Prevention Practices in Dental Settings

Dealing with infection prevention practices is one of the most important challenges to you and your patients' safety. This interactive, online article addresses the *Summary of Infection Prevention Practices in Dental Settings: Basic Expectations for Safe Care* introduced in 2016 by the Centers for Disease Control and Prevention. Completing this module is Step 1 in the new OSAP-DALE Foundation Dental Infection Prevention and Control Certificate Program™. [LEARN MORE!](#)
