

New! Online Infection Control Resources

The Organization for Safety, Asepsis and Prevention (OSAP) and the DALE Foundation have jointly launched two new interactive online Continuing Dental Education Article™ (CDEA®) modules. These modules have been created by leading infection control experts. You can read and review the article at your own pace, on your own schedule, with access to each article for up to six months.

Understanding CDC's Summary of Infection Prevention Practices in Dental Settings

Dealing with infection prevention practices is one of the most important challenges to you and your patients' safety. This interactive, online article addresses the *Summary of Infection Prevention Practices in Dental Settings: Basic Expectations for Safe Care* introduced in 2016 by the Centers for Disease Control and Prevention. Completing this module is Step 1 in the new OSAP-DALE Foundation Dental Infection Prevention and Control Certificate Program™ and is also a great way to earn CDE credits or simply learn more about this critical topic.

CDE Credits: 2

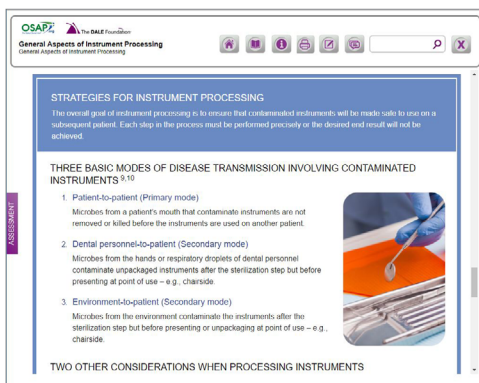

Price: \$30

General Aspects of Instrument Processing

Ensuring that dental instruments used in patient treatment have been properly prepared is one of the most important duties in the dental office. Instrument sterilization is just one step in the chain of procedures needed to prevent the spread of potentially pathogenic microbes from contaminated instruments to patients. This article presents a real-world scenario that provides context for important concepts of instrument processing, along with strategies and recommendations to prevent negative outcomes.
